

Dear parents,

Wish you a very healthy home stay and lively life.

I wish to ask for your cooperation to make the online classes as effective as possible. Many parents sitting on the other side do not realise the fact what happens when the class is going on. Children are children and it is our duty to make sure they learn good things and unlearn bad things. During online classes following things have been noticed:

1. Children do not speak at all when they are asked questions. Many students are not around and class goes on. It was observed that many seem to be present (shown by the picture of the student) but in fact, they are not around.
2. Students should understand that grace of teaching and learning should not be undervalued. Mostly, students are found either lying on the bed or sitting in odd position, or in a place not appropriate for teaching learning.
3. Our teachers are continuously, working hard for preparing materials and resources for effective learning outcomes, evaluation and assessments, which is mostly carried through google classes. It is found that many students are not entering their google classroom and not returning their assignments back to the teachers via google classes.

In the above light, School expects your cooperation in the following way:

1. Encourage your wards to be visible while teacher is teaching so that his/her movements and attention can be monitored. This is found to be much more effective than in a real class.
2. Arrange as much as possible, a separate place for your child as a study room/place and ensure minimum disturbance to him/her while class is going on.
3. Ensure your children are refreshed before sitting for the class. Encourage daily morning bath and other activities that will freshen them up for the classes.
4. Keep on checking your wards if he/she enters the google classroom to see if any assignment has been sent. And if any assignment is sent, they should return the work done in given time.

Be assured that school knows very well how to keep our students in the best of healthy education system. Some parents request us to make a different rule for their wards, which is against school policy. All student are equal for school, hence their welfare and productivity.

We expect parents to understand that initially, things might look out of place and out of comfort, but this is a different time, where change is inevitable, new horizon must be chased to see the new light or we are doomed in abyss of ignorance.

Whatsapp group of teachers students will be discontinued (if there is any) for internal policy of the school. However, help via individual message will always be available. School expects that most of the queries be directly sent to the school office or class teachers. School has a centralised system of messaging or passing information. School will not be responsible for outcomes due to information from any other resources other than school office information. There are certain numbers which may not be receiving information. Parents are requested to check with their network operators to check for this problem. If your phone number has changed, please update the same with school office.

Stay safe.

Thanks.

Principal
